

## **Defect report title: Bug Report for LinkedIn App**

**Defect ID: ST0001**

### **Device Information:**

- Device Model: Huawei PPA-LX2
- Android Version: 10
- Processor: Huawei Kirin 710

### **Defect Description**

- **Module:** LinkedIn Mobile App
- **Bug description:** While browsing job offers on the LinkedIn app, a functionality bug was encountered. The issue manifests when rotating the screen, causing the app to reset the scrolling position. Regardless of the scrolling depth, rotating the screen leads to a reset, starting from the beginning
- **Source:** Browsing job offers on the LinkedIn app

### **Version:**

- Application Version: 4.1.796

### **Action Steps:**

1. Open the LinkedIn app on an Android device.
2. Log in with a registered user account.
3. Perform a job search.
4. Apply the "Easy Apply" filter.
5. Scroll down a several screens.
6. Rotate the screen from portrait to landscape (or vice versa).

### **Expected Result:**

- Anticipated behavior is for the app to maintain the scrolling position and continue displaying job listings, inclusive of the "Easy Apply" filter, post-screen rotation. (Note: The issue persists even without filters.)

### **Actual Result:**

- Upon rotating the screen, the app resets my scrolling position to the top of the page.

### **Screen-cast:**

- A 15-second screencast is attached to this email.

### **Additional Notes:**

- This issue significantly disrupts user experience and can be disconcerting, particularly when sifting through a substantial number of job offers. We kindly request the LinkedIn development team to investigate and address this bug

### **Contact Information:**

- email: senadtopcicbu@hotmail.com or senad.topcic@gmail.com

### **Severity:**

- Medium

### **Priority:**

- High

Bugojno, 24.10.2023.

Sincerely,

Senad Topčić
