

Defect report title: T1_LinkForUnsolicitedApplication_LinkToWrongAddress

Defect ID: ST0001

Environment:

- Operating system: Windows 11 Home
- Browser: Chrome Version 119.0.6045.160 (Official Build) (64-bit)

Defect Description

- **Website URL:**
<https://www.wienerlinien.at/web/wl-en/career/search-job-offers>
- **Bug description:**
When attempting to submit an unsolicited application by clicking on the link, instead of redirecting to the desired form, the Outlook application opens as if prompting to send an email. The email field contains the incorrect address [<https://www.wienerlinien.at/web/wl-en/career/search-job-offers>]. Upon analyzing the web page, I identified an error in the line where `Send unsolicited application` mistakenly includes "mailto:".

Action Steps:

1. Open a web browser.
2. Enter the URL: <https://www.wienerlinien.at/web/wl-en/career/search-job-offers>
3. Scroll to the end of the page and locate the "Send unsolicited application" text link.
4. Click on the "Send unsolicited application" link

Expected Result:

- Clicking on the "Send unsolicited application" link should redirect the user to the form associated with <https://jobs.wienerstadtwerke.at/de/p/WienerLinien/jobs/208/form>.

Actual Result:

- Clicking on the "Send unsolicited application" link currently leads to the Outlook application opening, simulating an email send prompt, with the email field containing the incorrect address [<https://www.wienerlinien.at/web/wl-en/career/search-job-offers>]. The user is not redirected to the expected form at [<https://jobs.wienerstadtwerke.at/de/p/WienerLinien/jobs/208/form>].

Additional Notes:

- To resolve this issue, remove "mailto:" from the href attribute: `Send unsolicited application`.
- Additionally, I have recorded a screencast demonstrating the issue. Please let me know if you require the video to further clarify the observed behavior. I am ready to provide it upon request

Severity: low

Priority: medium,

Bugojno, 24.11.2023.

Sincerely,
